Titanium Information Group

Working together to promote the use of titanium

The Titanium Information Group (TIG) is an association of titanium suppliers, fabricators, users and other specialist technical organisations, working together to promote the use of titanium.

Benefits to members

- A website with a list of members and their products and services
- Distribution of free literature containing technical information and contact details of group members
- Representation at UK and international trade shows and seminars
- An online enquiry service where relevant enquiries are passed on to members for possible sales
- Market watch update to provide members with relevant technical and market information
- Access to a comprehensive technical library
- A forum to generate ideas, contacts and keep up to date with the titanium industry
- A voice to influence standards and government committees and to promote titanium in new applications
- Access to titanium related research and training, legislative advice and support

Benefits to enquirers

- Free technical helpline to answer questions directly or through the membership
- Free technical data sheets
- Handbooks on titanium, giving advice on the use and fabrication of titanium alloys in different engineering applications
- Access to technical staff with a comprehensive technical library

TIG is managed by
the National Metals
Technology Centre
